Spring Summer 2015 PAID INTERNSHIP OPPORTUNITY

Talent TVC Internships offer $6000 stipend, 400 hour commitment and Mid-Point and Final Project Presentation necessary for completion.

Task: Technical maintenance and repair of environmental chambers, two-axis trackers, and mechanical load tester used in the certification and reliability testing of PV modules. The maintenance program includes the ongoing validation testing of power supplies, temperature sensors, and force sensors. The intern would also be involved in the mechanical load testing of PV modules.

Skills and Experience:
Bachelor’s in engineering student with hands-on experience in large mechanical systems. Data analysis skills with a working knowledge of JMP software is desired, but a willingness to learn the software would be acceptable. A desire to work in renewable energy is strongly desired. Attention to details is a must.

Company: CFV Solar Test Lab
