

Instruction for Authors of Ultra-Wideband Printed Papers:

All persons having papers in the ultra-wideband sessions, whether contributing through AMEREM or AP-S, are eligible to have their papers published in a book (publisher Springer), the eighth in a series of such books (Ultra-Wideband, Short-Pulse Electromagnetics 8). If you wish to have your paper included you must order a copy of the book. The price of \$60.00 US has been subsidized from a higher price by the symposium. Please limit your contribution to eight (8) pages. See the website for detailed format instructions. We need a pdf file submitted to cebaum@ece.unm.edu . We would also like a hard copy.

Your paper can be submitted at the conference, and up to one month following the conference.

Sincerely,

The editors
(C.E. Baum, A.P. Stone, J.S. Tyo)
